

Mohamed Ali Gabal

Frontend Developer – React | Next.js | Typescript

Egypt – Mansoura | +20 100 103 4941 | abogabal672@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Profile

Frontend Developer with strong experience in building responsive and user-focused web interfaces using HTML, CSS, and Tailwind CSS, JavaScript, and React, Next.js and Typescript. Focused on creating clean, scalable UI components and integrating frontend applications with RESTful APIs. Passionate about UI/UX best practices, performance optimization, and writing maintainable code.

Experience

Rmoz Tech — (Aug 2024 – Present)

- Implemented a complete **authentication flow** including login, registration, logout, and protected routes.
- Developed user **dashboard** interfaces with **dynamic data rendering** and clean UI structure.
- Built and integrated **Ads components** ensuring smooth data handling and user interaction.
- Delivered fully **responsive layouts** optimized for mobile, tablet, and desktop.
- Integrated frontend with backend **RESTful APIs** handling **asynchronous requests** and state management.

AdWhales — (Feb 2025 – Jul 2025)

- Developed and customized marketing websites using **WordPress** and **Shopify**.
- Customized themes and UI components to match branding and marketing goals.
- Built responsive landing pages optimized for **performance** and conversion.

Frontend Developer Intern — (Feb 2023 – Jul 2023)

- Worked with **React** to create reusable UI components and manage **application state**.
- Integrated frontend with **RESTful APIs** and handled **data fetching**.
- Applied **UI/UX best practices** and ensured cross-browser compatibility.

Projects

Admin Dashboard [Github](#)

- Built a full-featured **admin dashboard** with **user management**, subscriptions, plans, and **roles & permissions**.
- Implemented **authentication system** including login, sign up, and **protected routes** with form validation using **React Hook Form** and **Zod**.
- Developed **analytics views** with **dynamic charts** and real-time KPI cards using **React Query** for data fetching.
- Integrated **dark/light mode** toggle with fully **responsive layout** across all screen sizes.
- Consumed **RESTful APIs** with efficient **server state management** using **React Query**.
